Readers are respectfully advised that the publication of material in this journal does not imply that the views and opinions expressed therein are shared by the Editor, the Entomologist's Record Committee or any party other than the named author or authors.

Entomologist's Record and Journal of Variation is a non profit-making journal, funded by subscription, containing peer-reviewed papers and shorter communications. It is published by the Entomologist's Record Committee, comprising the Editor, the Registrar and the Treasurer, from the Editorial address. An Editorial Advisory Panel exists to assist the Editor in his work.

The annual subscription for year 2005 is £28 for individual subscribers or £40 for institutions.

INSTRUCTIONS TO CONTRIBUTORS

- This journal publishes **peer-reviewed papers** and shorter **Notes** that are reviewed by the Editor. Contributions are accepted on merit, with no regard whatsoever to the occupation or standing of the author. All contributions should bear the name and postal address of the author(s), but titles or honours are not permitted and will be removed. One e-mail address may also accompany the contribution. First time authors and non-subscribers are welcome to send material for publication. We are able to include colour photographs from time to time at no cost to the author(s). Good quality monochrome photographs are always welcomed.
- The journal is concerned with **British Lepidoptera** (moths and butterflies). We also accept contributions on **British Coleoptera** (beetles), **British Diptera** (flies) and **other groups** at the Editor's discretion. We also print **Subscriber Notices** at no cost on behalf of current subscribers; non-subscribers pay a fee for this service. We also publish **Reviews of entomological books** and other publications relating to all aspects of world entomology if these are sent to the Editor at no cost to him. It is our policy not to accept unsolicited book reviews from third parties.
- We may also accept contributions on **European insects** if these are likely to be of interest to British readers, such as species likely to colonise Britain (especially where these contributions include identification keys or photographs), or accounts of entomological trips to places that may be of interest to other readers.
- **Papers** should be at least 2000 words in length. Acceptance is not automatic. They will be peer-reviewed by two referees. Authors must be prepared to make modifications suggested by the referees. Papers must cover their subject matter to a far greater depth than Notes and should present original material or a broad-based review of existing knowledge. Descriptions of new species may be submitted. Authors of papers are expected to follow the house style and conventions as closely as possible. The Editor reserves the right to convert papers into Notes.
- **Notes** are the meat of the journal! Most contributions will fall into this category. They will normally be less than 1500 words in length and can be very short indeed as long as the information they impart is interesting. We welcome Notes. There is no limit to how many you can contribute. Authors of Notes should try as far as possible to follow the house style and conventions, but the Editor will attend to these if errors are made.
- We accept all formats from hand-written notes upwards. However, we prefer submissions via e-mail, or on floppy diskette. Files must be in a PC-compatible format that is readable by Microsoft Word 2000. Originals are required for all photographs, drawings, diagrams, graphs, histograms and similar, though Tables may be incorporated into word processor files. For details, visit the web site or contact the Editor direct.
